WORK EXPERIENCE

Front-End Developer June 2023 - Nov 2025

Ørsted Services MY Sdn Bhd Bangsar South, KL, MY

- Built and maintained the frontend ecosystem for **60+** of **Ørsted's public-facing websites** using **Sitecore 10.4 CMS** and **Webpack frontend solution**, including enhancements to the **Sitecore CM** side to improve the content editing experience.
- Developed, maintained, and enhanced shared UI components using best practices such as **DRY-KIS**, with scalable markup built using the **BEM** methodology.
- Led the implementation of **Design Tokens** and worked closely with the Design Team using **Figma Variables**, to evolve the frontend design system for improved scalability and maintainability.
- Improved Ørsted's public-site **SEO** performance from a poor score to a passing score by improving the **Cumulative Layout Shift** score.
- Mentored two junior developers in **frontend fundamentals** and the **Angular** ecosystem, accelerating their growth and contribution to the team.

System Engineer April 2019 - May 2023

Silverline Dynamics Sdn Bhd Cyberjaya, SGR, MY

- Built and maintained front-end applications across multiple client projects, including an **E-commerce solution** and a **Highway-management system**, using **Angular** in a multi-application environment.
- Introduced and maintained a **monorepo** architecture using **Nx** and **Angular**, streamlining development workflows and improving consistency across **multiple interconnected web applications**.
- Implemented frontend best practices such as **DRY-KIS** and **strict compiler rules**, resulting in a significantly **cleaner codebase** and a **70% reduction in bugs**.
- Served as **Front-End Team Lead**, mentoring developers and collaborating closely with designers to deliver clear, scalable UI/UX using **Figma** and **Atomic Design** principles.

ABOUT

I'm a passionate Front-End Engineer with 6+ years of experience creating intuitive, high-quality user interfaces.

I love writing scalable, maintainable code and collaborating with teams to build thoughtful, reliable products.

Recently, my work has focused on scalable design systems—including multi-dimensional theming—while staying current with modern frontend technologies like Angular and CSS.

EDUCATION

BEng. in Electronics-Computer and Information (Hons)

International Islamic University Malaysia (IIUM), Gombak

CGPA: 3.01

Jan 2015 - Jan 2019

SKILLS

Programming Languages

Javascript, Typescript, SCSS, HTML, CSS
